Teacher Guide

Everything you need to run Vocaband in your classroom.

A practical walk-through written for English teachers in Israeli schools. Designed to be read once, then kept open on a tab for the first week of class.

Grades 4–9 | Hebrew & Arabic support | Set 1 / Set 2 / Set 3 + custom lists | No app install required

1 · Sign in and create your class

You only need to do this once. After your first sign-in everything is remembered for the next session.

1 **Open vocaband.com on any browser**

No installation, no extension, no app store. Works on a school PC, Chromebook, tablet, or phone.

2 **Click "Teacher Login" and sign in with Google**

Most Israeli schools use Google Workspace, so this is one click. If your school uses Microsoft 365, choose Sign in with Microsoft. No password to remember.

3 **Create your first class**

Pick a name (e.g. "5B English"), grade level, and the curriculum set you teach from: Set 1, Set 2, Set 3, or your own custom list.

4 **Share the 6-digit class code with your students**

They join from the same vocaband.com on their device, type the code, pick their name from the class list, and they are in. No emails, no passwords.

TIP

You can also let students join by **QR code** instead of typing. Click "Show QR" on your class card and point the projector at the wall — every student in the room joins in 5 seconds.

SCREENSHOT

2 · Create assignments

An **assignment** is a chosen list of words plus the game modes students are allowed to use. You can have several running at once.

Three ways to pick words

- **From the MoE list** — choose Set 1, Set 2, or Set 3 and tick the words you want. Most teachers start here.
- **Custom list (type it in)** — paste 10–30 of your own words. Translations and audio are generated automatically.
- **Custom list (upload a photo)** — point your phone camera at a printed list and Vocaband reads the words for you (OCR).

Choose the modes

Each assignment lets you tick which of the 10+ game modes students are allowed to play. Start small — 2 or 3 modes is plenty for week one. You can always add more later.

Classic
See the word in Hebrew/Arabic, pick the English meaning from four options.

Listening
Hear the word spoken, pick the matching English.

Spelling
Hear the word, type it letter by letter.

Matching
Drag English to its Hebrew/Arabic translation.

Memory Flip
Flip pairs of cards to match translations.

Sentence Builder
Drag scrambled words to build a real sentence.

HOW IT SCALES

Vocaband ships with about **6,500 curriculum words**, each with audio in English, Hebrew, and Arabic. Custom words you add get audio automatically — no recording needed.

3 · Live Challenge & analytics

Live Challenge turns your projector into a leaderboard while the class plays the same set of words at once. Use it for a 10-minute warm-up or a celebration at the end of a unit.

1 **Pick a word list**
Use the current assignment or any list you have created.

2 **Project the room code**
Vocaband shows a big QR code and a 6-digit room code. Students scan or type to join.

3 **Start the round**
Everyone races through the same questions. The big-screen leaderboard updates after each word — top three get a podium animation.

What you see after class

XP		%
PER STUDENT	STREAKS (DAILY PLAY)	ACCURACY PER WORD

The teacher dashboard shows you which **words are still tricky** for each student, who is **falling behind**, and who is **on a streak**. Use the per-word view to plan your next 5-minute drill.

> **TIP**
> Sort the class by "words still wrong" once a week. The top 3–5 names are the students who need a quick one-on-one minute — not the whole class slowed down.

4 · Tips, troubleshooting & support

The little things that make week two smoother than week one.

Classroom flow

- Start with **10 words** for the first assignment, not 30. Build confidence first.
- A **5-minute Live Challenge** at the start of the lesson is a brilliant warm-up — students arrive early to grab a seat.
- Let students **pick their avatar** in the first 2 minutes. Ownership matters.
- Stars, streaks, and the daily chest exist to make practice feel like a game — you do **not** need to track them for grades.

Common questions

Situation	What to do
A student forgot which class they joined	Ask them for their name — you can see them under "Students" on the class card and resend the join link.
Audio is not playing	Check the device volume and that the browser tab is not muted. On iPads, tap the screen once to allow audio.
A student says the translation is wrong	Open the word in your dashboard and click "Suggest fix" — the team is alerted. Custom words can be edited directly.
Two teachers share one class	Add the second teacher via Settings → Co-teachers. Both have full edit rights.

NEED HELP?

Email **contact@vocaband.com** or open the in-app chat from the teacher dashboard. We answer within one business day in English, Hebrew, or Arabic.
