Privacy & Data

A short, plain-English summary for school administrators.

What Vocaband collects, why, where it is stored, and how long it stays. A one-page version for the staff room is on the next page.

DRAFT v1 | Pending legal review | EU-hosted data | No ads to children

What we collect

Vocaband is designed to collect the minimum needed to make a vocabulary classroom work. The list below is exhaustive.

DRAFT **This document is a working draft awaiting legal review. The final, signed version is what should be shared with schools, the Ministry of Education, or parents.**

For teachers

- Email address — used only for sign-in (Google, Microsoft, or one-time email code).
- Display name — taken from the OAuth provider; editable.
- Class names, assignment configurations, and the word lists the teacher creates.

For students

- Display name — chosen by the teacher when adding students. **No student email or phone number is required.**
- Per-word progress (correct / wrong / how many tries), XP, streak counter, avatar choice.
- Game session timestamps (so we can show the teacher who played today).

What we do NOT collect

- No advertising identifiers, no third-party tracking pixels.
- No parent contact details, home address, phone number, or photographs.
- No microphone or camera data, except when the teacher voluntarily uses the camera to OCR a printed word list — the image is processed and discarded.

> **IN PLAIN ENGLISH**
>
> A child can use Vocaband without ever giving the app their email, phone, or any personal contact information. The teacher is the only adult-identifiable account.

Where it lives & how long

Where data is stored, who can access it, and what happens at the end of the school year.

DRAFT **Pending legal review.**

Storage location

All teacher and student records are stored in the **European Union** (Frankfurt, Germany) on Supabase's managed Postgres. Audio files and images are stored on Cloudflare R2 with EU residency.

Who can access the data

Who	What they can see
The teacher who created the class	All progress, XP, and answers for the students in their class.
Co-teachers added by the original teacher	The same view as the original teacher.
The Vocaband engineering team	Aggregated metrics for product improvement. Access to per-student data is gated behind support-ticket workflows and is logged.
Students	Their own progress only. They cannot see other students' answers or names outside their own class.

How long we keep it

- Active classes — kept while the teacher's account is active.
- Closed classes — kept for up to **24 months** after the last activity, then anonymised.
- A teacher can delete their account at any time; this removes all classes and student records associated with that teacher.

Security highlights

- All traffic is encrypted (TLS 1.3, **SSL Labs A+**).
- Per-row authorization in the database (RLS) — a teacher can technically only read the rows that belong to their own classes.
- Annual independent penetration test (planned for **summer 2026**).
